High Performance Digital Portion Control Scales

Save money on high cost foods with digital portioning.

- Dishwasher safe removable stainless steel platform
- Reads in fractions, decimals and grams
- Temperature compensated load cell for use in refrigerated prep rooms
- 250 lb overload protection provides ultimate durability
- Sealed chassis resists airborne contamination
- Includes AC adapter; 50 hour rechargeable battery or 9V battery (not included)
- Easy to read ½" LCD display

TEMPERATURE MONITORING IS A CRITICAL PRACTICE TO ENSURE PROPER FOOD SAFETY.

Thermocouples are widely used in the foodservice industry for their ability to provide quick and precise temperature measurements. Thermocouples have built-in microprocessors that provide reads within 1/10th of a degree. Response time of a thermocouple can be 3–4 times faster than a mechanical pocket thermometer and 2–3 times faster than a standard digital thermistor thermometer. Everyone from health inspectors to chefs uses thermocouples due to their ability to measure a wide range of temperatures quickly and accurately to ensure proper food safety.

TMP4000

Thermocouples provide fast and accurate temperature solutions for any foodservice operation.

Thermocouples New!

Essential tool for any HAACP plan.

NSF

TMP800

- Super fast 3 second temperature response
- Open to turn on, close to turn off—easy to use, no buttons
- Microtip thermocouple folding probe perfect for thin sliced deli meats and delicate foods
- NSF approved

TMP800

TMP2000, TMP4000

- Min/Max/Hold modes
- Probe included with built-in storage and protection
- Dual read Fahrenheit and Celsius
- IP54 rating for dust and moisture
- 8:1 IR Ratio (TMP4000)
- Auto Off, Low Battery
- 9V battery and custom travel pouch included
- NSF approved

CE   TMP2000

CE   TMP4000

TYPE K THERMOCOUPLE PROBES
Temperature monitoring evolved.

- Manufactured and tested 4x greater than standard ANSI specifications
- Super fast 2–3 second temperature readings
- Interchanges with TMP4000 and TMP2000
