

Tableware

Continental **h** vitrified
otelware

Continental offers a highly durable and white product. The pieces are pin fired to ensure continuity of glaze. The glazed foot of the flatware prevents scratching and metal marking on the eating surface from taking place.

Continental Vitrified Hotelware has been produced by the same factory since 1959 and uses the principles of ISO 9002 to ensure consistent quality. This Vitrified Hotelware is produced from a specially formulated body containing Alumina that adds strength and durability to every piece. Article rims are reinforced to guard against chipping, and spouts and handles are specifically designed to minimize breakage.

Continental products conform to the British Standard BS 4034 and are designed to stack, which aids storage and facilitates space saving. Continental's Vitrified Hotelware products are microwave oven safe provided that articles do not have precious metal decorations (i.e. gold or platinum). They are oven and dishwasher safe. Products can safely be taken from freezer to microwave.

Continental's claim to superior product durability is supported by a 5-Year Edge Chipping Warranty on its entire range of products including hollowware.

Selling Features

Conforms to BS 4034 standards to ensure the highest production standards, guaranteeing consistency and durability

Product is pin fired, ensuring continuous glazing and sealing all pores for superior hygiene, preventing premature discoloration, scratching and cross contamination by an unglazed foot.

Vitrified product has outstanding impact strength, and is scratch resistant, thermal shock resistant, oven and microwave safe, dishwasher proof and extremely hygienic.

Continental has an extremely white body, with an extensive product range, and a continually increasing selection of shapes, for ease of future expansion as menus and trends change.

Continental cups, saucers, soup cups and fruit nappies are designed to stack into competitor's products, making for an easy transition into competitor installations.

Designed and manufactured to withstand commercial abuse!
